## Notification Page

| Test                                                           | Status | Duration | Notes                                                                                                                                                |
|----------------------------------------------------------------|--------|----------|------------------------------------------------------------------------------------------------------------------------------------------------------|
| Verify Notification Page Load                                  | PASS   | 2.8s     |                                                                                                                                                      |
| Verify User Notification for Company Creation                  | SKIP   | -        |                                                                                                                                                      |
| Verify User Notification for Company Update                    | PASS   | 30.3s    |                                                                                                                                                      |
| Verify User Notification for Company Deletion                  | SKIP   | -        |                                                                                                                                                      |
| Verify User Notification for Factory Update                    | SKIP   | -        |                                                                                                                                                      |
| Verify User Notification for Device Creation                   | FAIL   | 43.1s    | Intermittent: reproduces the same cross-module company-row click as the Factories suite; passes when driven manually. Under continued investigation. |
| Verify System Notification for Camera Offline                  | PASS   | 2.2s     |                                                                                                                                                      |
| Verify System Notification for Belt Running with No Production | PASS   | 2.0s     |                                                                                                                                                      |
| Verify System Notification for Network Error                   | PASS   | 2.1s     |                                                                                                                                                      |
| Verify Notification Details                                    | PASS   | 1.2s     |                                                                                                                                                      |
| Verify User vs System Notification Counts                      | PASS   | 1.4s     |                                                                                                                                                      |
| Verify Notification Mark as Read                               | PASS   | 1.2s     |                                                                                                                                                      |
| Verify Mark All As Read                                        | PASS   | 2.4s     |                                                                                                                                                      |
| Verify Notification Sorting                                    | PASS   | 1.1s     |                                                                                                                                                      |
| Verify Notification Pagination / Load More                     | PASS   | 2.8s     |                                                                                                                                                      |
| Verify Notification UI Responsiveness                          | PASS   | 1.3s     |                                                                                                                                                      |
| Verify Notification Persistence                                | PASS   | 1.5s     |                                                                                                                                                      |
| Verify Notification Bell Shows Unread Count                    | PASS   | 1.1s     |                                                                                                                                                      |

Skipped tests target flows not exposed by any documented UI (company creation/deletion) or destructive to shared UAT data - see inline code comments in notifications.spec.js.
